

FinWise:

Trading Solution for the common man

A Dashboard service for easy access to Trading Infographics, details and advice. All powered by RAGs and LLMs to give you comprehensive results and sound advice

presented by
CHAOTIC CODING CATS

FinWise

TARGET PROBLEM:

Many beginners and casual traders lack access to real-time data, effective tools, and educational resources, leading to uninformed trading decisions.

Our Solution, **FinWise**, provides a comprehensive trading platform that integrates real-time data, personalized advice, risk management tools, and educational resources, empowering users to make informed and confident trading decisions.

- **Retrieval-Augmented Generation (RAG):** RAG delivers real-time financial insights by retrieving market data.
- **Chatbot Integration:** Chatbot offers guidance, answers questions, and provides insights.
- **Risk Management Tools:** Risk management tools help traders effectively control their risks.
- **Portfolio Tracking and Analysis:** Portfolio tracking helps users monitor health and identify opportunities.
- **Dashboards:** show stock performance and trends for easy navigation.
- **Upstox API:** provides real-time data and trade management.
- **Large Language Models (LLM):** LLMs predict trends and provide personalized trading advice.
- **Customizable Alert:** Customizable alerts keep users informed of important market shifts.

AI Integration

Integrating AI into Finwise enhances scalability, efficiency, and accuracy, enabling real-time financial insights and optimized resource management

1.RAG:

We use RAG to deliver highly relevant and up-to-date financial information, ensuring users are always informed of the latest trends and data.

2. Chatbot Integration:

Chatbot offers guidance, answers questions, and provides insights.

3.Large Language Models (LLM) :

LLMs predict trends and provide personalized trading advice.

Sponsor Integration: Integrating OnDemand into FinWise enhances scalability and performance, enabling efficient data processing and dynamic scaling. It optimizes costs, prevents downtime, and frees your team to focus on improving AI models and financial algorithms, ensuring faster, more accurate financial advice.

Technical Details

Our model works on a **Retrieval Augmented Generation (RAG)** based backbone, using embeddings to query search, the large repository of information from different related news sites, and from **upstox API**. This gives us

1. Secure Access

Authentication powered by Supabase for reliable, secure user access

2. Real-Time Stock Data

Seamless integration with Upstox API for live-stock data retrieval.

3. Dynamic Tracking

Users can add stocks and manage investments in a real-time database.

4. Personalized Insights

RAG-powered chatbot provides tailored recommendations using live financial news.

5. Voice Interaction

Text-to-speech delivers immersive, hands-free advice and updates.

Flow Chart

Impact & Benefits

- **User Empowerment:** Informed and confident traders.
- **Enhanced Experience:** Intuitive design and real-time tools.
- **Community Learning:** Social features fostering collaboration.
- **Risk Mitigation:** Tools for better risk management.
- **Increased Efficiency:** Automation and analytics for better performance.
- **Valuable Insights:** Comprehensive data and predictions.

Feasibility & Business Model

- **Business Model:**
 - Subscription-based model with tiered access to features. (**Pay as you go**)
 - Revenue from **partnerships** and **affiliate trading** platforms.
 - Potential for **strong growth** and **promotes** itself on advanced analytics tools.
- Feasibility:
 - Market demand for beginner-friendly trading platforms.
 - Existing technology partnerships (e.g., Upstox) enhance credibility.
 - Scalable architecture to accommodate user growth.
